

Nvidia Shield Tablet Rear Case Replacement

Follow this guide to replace the back casing of your Nvidia Shield Tablet.

Written By: Molly Bauer

INTRODUCTION

The case of any device is always the first line of defense against any kind of external damage. The Shield Tablet in particular is known to be susceptible to casing cracks, specifically at the corners. This guide will show you the step-by-step instructions required to replace your cracked case.

TOOLS:

- [Anti-Static Wrist Strap](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Rear Case

- First, remove the stylus from your tablet.

Step 2

- Set the tablet so the buttons, microSD, and stylus port are facing you.
- Open the microSD slot.
- Using the flat end of the spudger tool, carefully pry open the case starting from the microSD slot, slowly sliding the spudger along the inside edge of the case.

 You may want to put on your anti-static wrist strap at this point as the motherboard will be vulnerable to physical touch and electrostatic shock after the casing is removed.

Step 3

- As you remove your case, be aware of small clips along the edges.
- Finally, set the old casing aside.

To reassemble your device, follow these instructions in reverse order.
